

# Indoors or Outdoors

## Rheem Optima

The Rheem Optima is a mains pressure electric storage system that is a family favourite with a size for every home. Suitable for indoor or outdoor installation and available in capacities from 180 to a massive 400 litres. The Optima features a user-adjustable thermostat so you can dial up your perfect temperature setting. The 300 and 400 litre models feature twin elements and its long life design attracts a 10 year warranty. Hot Water delivery is up to 40 litres per minute and the larger models are also compatible with solar energy inputs.

These are ideal units for large families who want multiple showers and other hot water draw-off simultaneously. Rheem Optima also suits homeowners wishing to take advantage of night/rate electricity tariffs.

**Fact:** If your low pressure water heater needs replacing but your budget is tight, you can install a **Mains Pressure** cylinder and run it at low pressure until such time as the budget allows.

### Rheem Optima

- Ultra long life design
- User adjustable thermostat
- Suitable for a wide range of water qualities
- Delivers up to 40 litres of hot water a minute

## Rheem Low Pressure Electric

Low pressure cylinders were the only option available until the early 70's and tend to be fitted in older homes. Low pressure cylinders are identifiable by the copper pipe sticking straight up through the roof or the large pressure reducing valve on the inlet. If in doubt, turn your hot and cold water taps on full at the basin. If there is a big difference in flow, then you probably have a low pressure cylinder. They are a good choice for wetback systems and in situations where a replacement is required at the lowest cost possible.

## Wet Back

Rheem New Zealand manufacture a range of pre-wired Wetback Water Heaters which come fitted with element and thermostat. From 135L to 270L as standard or give us a call for custom made options to suit your needs.

### Rheem Low Pressure Electric

- Choice of 3 inlets
- Surpasses MEPS energy performance standards
